- Software Testing
- SE Optimization
- Progressive Enhancement
- Responsive Web Design
- UX Design/Strategy

Matheus Rodrigues

Full Stack Developer

A full-stack developer with a passion for solving real life projects and cause a real impact into the real world through lines of code.

Experience

I've worked on a handful of web projects over the past 4 years, some of which were for the following organizations:

Wellon Digital — Fullstack Developer   Jan 2022 - Present

Currently working as a fullstack developer at Wellon Digital. I am responsible for building and maintaining the frontend and backend of the company's products.

- - I developed a data visualization system that displayed user data in graphs to provide insights on user demographics such as age, location and health insurance. This helped managers make data-driven decisions and gain a better understanding of their user base.
- - Designed and implemented the part of the system responsible for register SQL queries through a user-friendly interface
- - Designed and implemented the Chatbot system interface. Also did part of the backend implementation.

Giross Delivery — Fullstack Developer   Set 2021 - Dec 2021

I worked as a fullstack developer at Giross Delivery. I was responsible for building and maintaining the frontend and backend of the company's products.

- - Prototyping and implementation of the "Giross Dashboard for Companies". Product responsible for the exclusivity of Giross in the delivery market.
- - Implementation of test routine for all API endpoints using Postman.
- - Improved several screens in the existing application for companies, improving the user's conversion rate and reducing confusion due to lack of clarity in the UI (User Interface).
- - Development of the entire main website giross.com.br, from design in Figma to implementation in Angular.js.
- - Prototyping of the new motorcyclists application in Figma, as well as implementation in React Native.

Meral Lab (Freelancing Agency) — Fullstack Developer   Jan 2021 - Set 2021

I worked on a couple of projects for this agency as a fullstack web developer contractor.

- - Beauty System: Scheduling system for beauty salons with more than 22,000 professionals using it daily. (www.sistemabeauty.com.br). I was responsible for implement the whole design in Figma into the frontend.
- - Academy of Preachers: Video library of classes similar to Netflix aimed at the Christian public, offering theological training completely online. (www.academiadepregadores.org). I implemented most of the frontend features on the web and mobile versions of the application.

Projects

Links to some of my work can be found on **matheusrodrigues.dev/work** and details can be provided upon request via a scheduled demo call.
